8th Multi-stakeholder STI Forum—2023

Virtual Side Event

Open Science to Transform Health and Education Systems

Date: 3 May 2023 Time: 8:30 am to 9:45 am (EST)

The objectives of this Virtual Side Event, is to share:

- The experiences of various technological solutions, in improving the affordability and accessibility of quality education and healthcare services for all .
- The Experts and Speakers, will highlight, how to best apply technology in the learning process. It is the poor and marginalized in our society and in our world, who have the most to gain, from the advances in science, technology, innovation, affordable e-Health & e-Learning—sadly—at this point, they are often the groups, who benefit the least.
- STI Solutions for the Least Developed Countries (LDCs) – Lessons Learned from Pandemic.
- Countries should take rapid actions towards the *Broad Band Internet* connectivity to their population.
- Women's Health and Education Center (WHEC) with its partners, will continue to support country actions, & strengthen inclusive digital learning platforms and high quality information , world wide.

Open Science - a way forward!

Speakers / Presenters: World Health Organization (WHO) and Carnegie Mellon University (Pittsburgh, USA and Africa)
